Design Thinking and Innovation Milestone Three- 2023 Batch

Deadline: 13 April 2025 - 23:59 hrs.

NOTE: One member from each team should fill out the form.

The third and final milestone is a major task and consists of 50 marks. Any laxity in preparing for this may cost you your grade in this course.

The form will be checked for plagiarism using Turnitin/Cross-Check and Language Checker. If the form is not submitted by the due date, your evaluated marks will be reduced by two points for each day it is late. If your plagiarism score is higher than 5%, you will get zero marks overall. If your language checker finds more than 50 errors in the whole form, you will get zero marks overall.

Spend sufficient time to build the answers. Some marks are assigned to each question. A rubric sheet has also been uploaded on LMS regarding the evaluation criteria for every question and the content of your answer.

Any white spaces or other manipulation to fulfill the criteria of minimum characters to answer the question will attract zero marks out of 50 in the third milestone.

* Required

* This form will record your name, please fill your name.
